ASSEMBLY INSTRUCTIONS

Wood
Dining Table
CDT 700

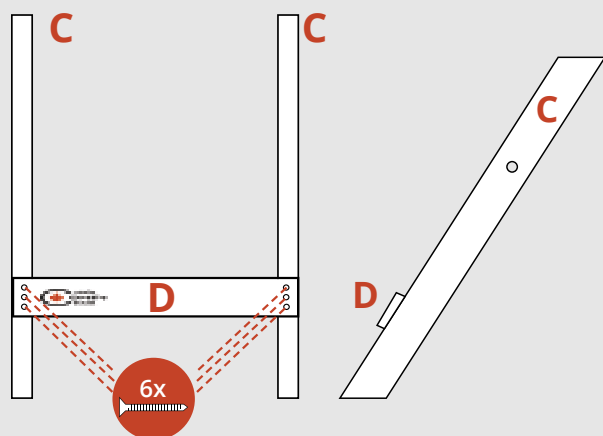

Before you start

- Carefully unpack the package and check if all components are present.
- Required for assembly: cordless drill, hammer and an wrench 13. The bit for the drill machine is included in the bag of screws.
- For the CDT 700, all attachment points with screws should be glued (4x40) using the wood construction glue provided for added stability. One tube of glue is enough for three pieces of furniture.
- Due to the drying of the glue you can only coat the chair with oil after assembling it.

Step 1 | Components A and B

- Grab the two boards A and one board B. Place B between the boards A, above the large screw holes in A.
- Attach B with three 4x40 mm screws on each side. Use the pencil marks as reference points.
- Take the other board B and repeat this step at the bottom of boards A.

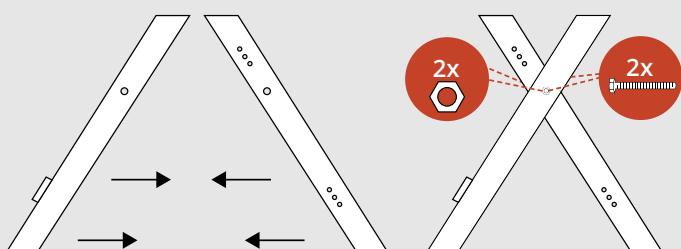

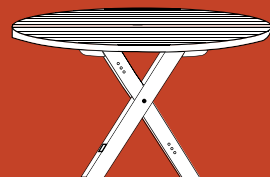

Step 2 | Components C and D

- Take slats C and D (with the logo) and attach them with three 4x40 mm screws on each side.
- Use the pencil marks as reference points.

Step 3 | Table leg construction

- Put the two assembled pieces together. Place the construction A+B between the construction C+D.
- Attach the table legs together with a bolt + washer and a nut + fastener on each side.
- **Note:** do not over-tighten, the legs should be able to move back and forth.

Step 4 | Move the table legs

Before placing the table top onto the legs, push the legs towards each other and fold them together.

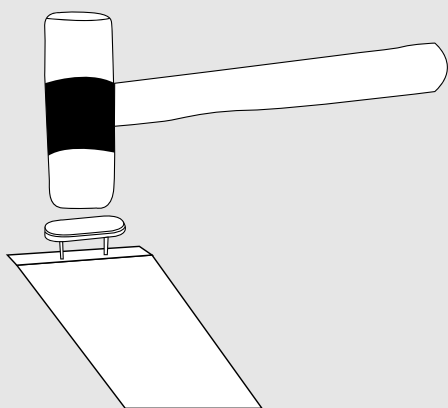

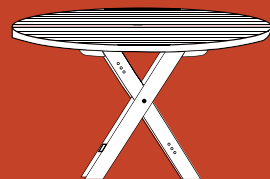

Step 5 | Tabletop

- Take tabletop E and put it upside down on the floor.
- Insert the table legs between the two slats that are mounted on the table top.
- Spread the table legs as far as they can go. The top of the table legs fit exactly in width between the slats on the table top.

Step 7 | Furniture glides

Use a hammer to attach the 4 furniture glides under the table legs.

Step 6 | Setting the table

Turn the table over and place it on the floor. Rock it backwards and forwards until it is stable is steady.

Finished!

Enjoy your new Dining Table!
