Assembly instructions

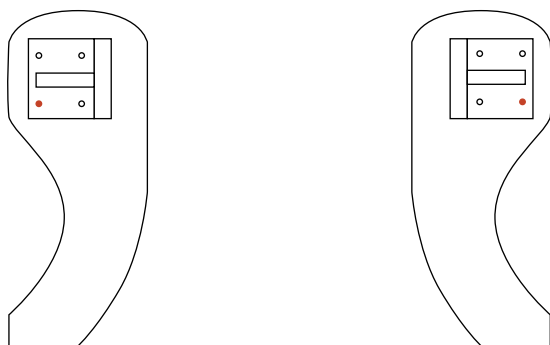

Tete-a-tete
Double Chair Rounded
Wood

Before you start

Carefully unpack the box and check that all parts are present.

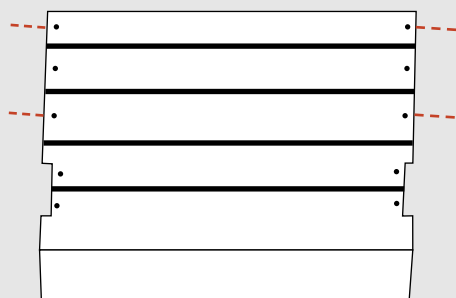

- Required for assembly: cordless screwdriver. The bit for the screwdriver is included in a bag of screws with the seats.
- We recommend gluing all connection points with the wood construction adhesive.

First assemble the 2 seats using the assembly instructions for the CCC 100.

Step 1

Secure the two inner armrests with a 4x30 screw and let the armrests protrude in the middle by about 2.5cm.

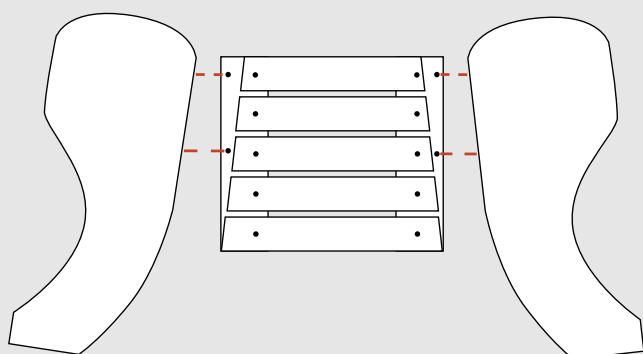

Step 2

Now place the lower table top and screw it down with the screws 4 x 30mm.

Tete-a-tete Double Chair Rounded

Step 3

Then place the top table top and check that it fits nicely with the armrests, you can correct this by sliding the armrests. If everything fits together nicely, you can glue and screw everything together.

Finished!

After work done, it's good to rest in your Comfy Chair Duo. Enjoy!
