ASSEMBLY INSTRUCTIONS

Wood
Side Table
CST 400

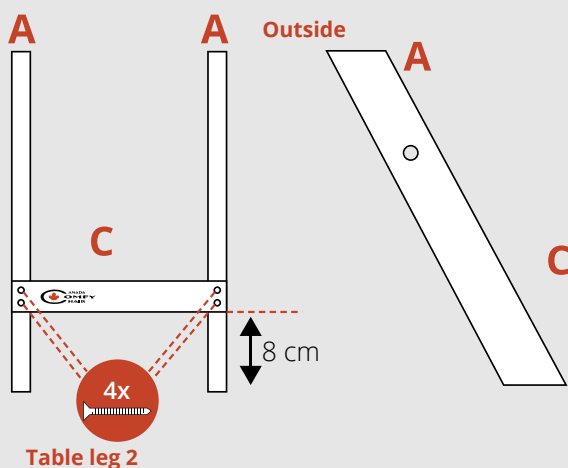

Before you start

- Carefully unpack the package and check if all components are present.
- Required for assembly: cordless drill, hammer and an wrench 13. The bit for the drill machine is included in the bag of screws.
- For the CST 400, all attachment points with screws should be glued using the wood construction glue provided for added stability. One tube of glue is sufficient for three pieces of furniture.
- Due to the drying of the glue you can only coat the chair with oil after assembling it.

Step 1 | Table leg 1

- Grab the two slats A with the four pre-drilled screw holes on the side.
- Attach one slat B horizontally on the sides of A. Use the pre-drilled screw holes in A as reference points.
- Place a second slat B on the A slats.
- Secure B to A with four 4x40 mm screws per slat (two per side).

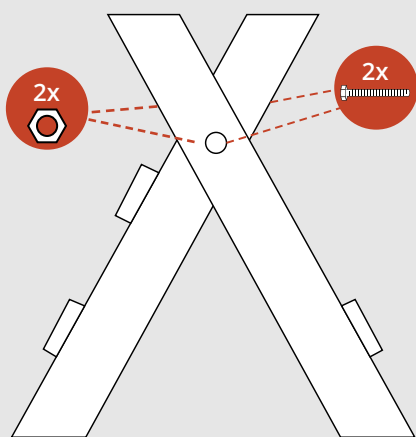

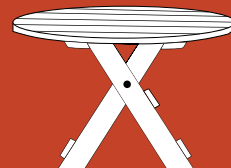

Step 2 | Table leg 2

- Take the two A slats with two pre-drilled screw holes on the side.
- Place slat C on top of those. Use the screw holes as reference points.
- Secure slat C with two 4x40 mm screws on each side.

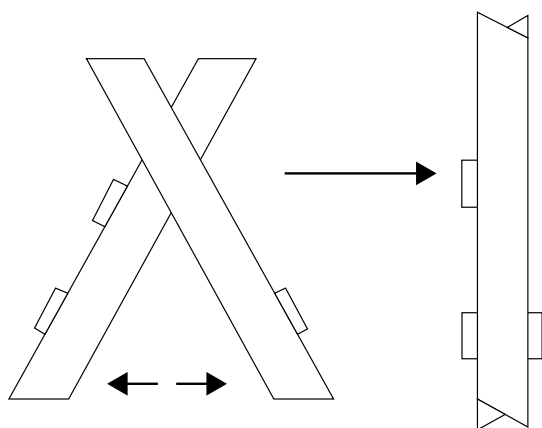

MONTAGEHANDLEIDING

 Side Table
 CST 400

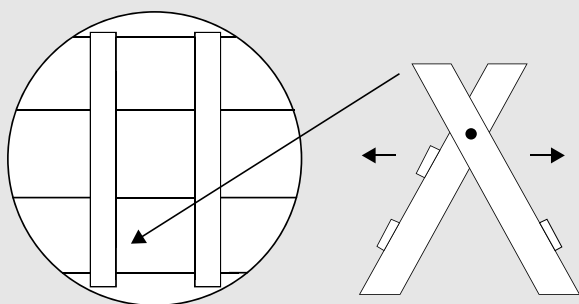

Step 3 | Assembling the table legs

- Connect the table legs by placing a bolt + washer on each side. Tighten with a nut + washer.
- **Caution:** do not overtighten. The legs must be able to move.
- **Do not use glue** on these compounds!

Step 4 | Inklappen

Before placing the table top onto the legs, push the legs towards each other and fold them together.

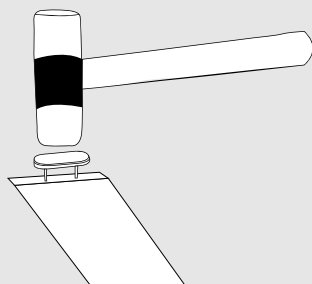

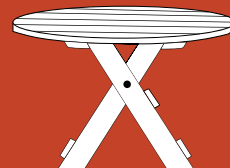

Step 5 | Unfold

- Take table top (D) and place it upside down on the floor.
- Place the table legs between the two slats you see on the table top.
- Spread the table legs as far as they can go. The top of the table legs fits exactly in the inclination formed by the planks which are attached to the table top.
- Tighten the nuts so the table stands firmly.

Step 6 | Furniture gliders

Use a hammer to attach the 4 furniture gliders under the legs.

Finished!

Turn the table over and set it on the floor.
Have fun with your Side Table CST 400!
